GADGET OF THE WEEK

THE Dust Tamer is a modern version of the traditional sheepswool duster. It is housed in an electrically charged case, which gives the duster a charge that enables it to attract the dust, instead of just spreading it around. It also has a HEPA filter, which enables it to capture 99.97 per cent of all dust, pollen, bacteria and other allergens. The charged case then extracts the dust from the duster so you can dispose of it cleanly and efficiently.

Available from
allergymatters.com or
mail order on
020 8339 0029,
price £99.95.

GADGET OF THE WEEK

THE Enviro Airfree Air Sterilizer is designed to eliminate the problems associated with airborne allergens and micro organisms — silently. It uses heat to sterilise the air dragged into its ceramic core by convection. This incinerates any living micro organism, bacteria or virus — leaving your home safer and cleaner. Organic odours and tobacco smells are also eliminated, and mould and mildew destroyed. The Airfree requires no filters and needs no maintenance. Available from www.allergymatters.com, or on 0800 052 8228. It costs £169.95 plus p&p.

GADGET

THE new AllerVia Dust Mite Destroyer emits pulsing electronic waves that are harmless to humans, but troublesome to the reproductive cycle of dust mites. For best results, keep plugged in. It costs £29.95

plus p&p and is an ecologically sound way of ridding your home of allergens. Available from www.allergymatters.com or call 0800 052 8228.
